Backend & Databases	Node.js, Express.js, MongoDB, Mongoose ORM, REST API Design, Server Routing, CRUD Operations
Tools & Workflow	Git, GitHub, Vercel Deployment, Postman API Testing, NPM, VS Code, CI/CD Baselines

Featured Software Development Projects

ComeAgain — Full-Stack Web Application

- Architected and deployed a full-stack web application utilizing React for frontend component rendering and Node.js/Express for server logic.
- Engineered database schemas and seamless CRUD operations with MongoDB and Mongoose, ensuring data integrity and fast retrieval speeds.
- Configured end-to-end continuous deployment using Git/GitHub for version control and Vercel for live application hosting.
- Integrated RESTful APIs and optimized state management to deliver a fast, fully responsive mobile and desktop user interface.

Collaborative Web Development & GitHub Contributions

- Collaborated within multi-developer GitHub workflows, managing feature branches, pull requests, and resolving merge conflicts.
- Developed reusable React components following modular programming standards to maintain clean, scalable codebase structures.
- Utilized Postman to rigorously test backend routes and HTTP request responses prior to production release.

Professional Experience & Transferable Skills

Freelance Web Developer & Educator

- Deliver structured instruction and problem-solving methodologies, translating complex technical logic into accessible concepts.
- Manage independent business operations, demonstrating strong discipline, time management, and client communication skills.
- Continuously integrate modern software practices, keeping up-to-date with ecosystem developments in modern JavaScript frameworks.

Education & Continuous Learning

- **Full-Stack Web Development** (TS ACADEMY) — Comprehensive Coursework & Project-Based Learning (JavaScript, React, Node.js, Express, MongoDB)
